Confined Space Safety Assessment

Asset ID: CSSA-18 Origin Date: July 2019 Building: Various Dock Locations Revision # O Entry Location: Front of pit, under leveler Revision Jate: - Entry Purpose: Repair and Maintenance Revision Date: - SECTION 2: Confined Space Determination If needing to enter an enclosed space, indicate which of the following apply: Yes X 2. Does the space have limited or restricted means for entry or exit? (Would it be difficult to exit the space inneed for continuous engoyee occupancy) X X 3. Is the space inhered for continuous engoyee occupancy? If we a confined space. X X Obes this space meet the definition of a Confined Space? Yes Yes SECTION 3: Assessment of Atmospheric Hazards Means to Eliminate Atmospheric Hazard Yes Atmospheric Hazard Actual or Potential Hazard? Can it be Means to Eliminate Atmospheric Hazard Moxygen Deficiency X Image: Section State Section Secti	Confined Space ID.	Deck	ovolor Dit				Dovelaned Pur	The bas	0.0	-	
Building: Various Dock Locations Revision # 0 Entry Location: Front of pit, under leveler Revision Date: - Entry Purpose: Repair and Maintenance Revision Date: - SECTION 2: Confined Space Determination If needing to enter an enclosed space, indicate which of the following apply: Yes 1. Is the space large enough and so configured that you can bodily enter and perform work? X X 2. Does the space have limited or restricted means for entry or exit? (Would it be difficult to exit the space through a standard door, ramy, or OSHA-compliant stars?) X X 3. Is the space intended for continuous concupancy) If you have checked ANY of the highlighted boxes, you <u>DO NOT</u> have a confined space. Otherwise, you have a Confined Space? Yes SECTION 3: Assessment of Atmospheric Hazards Means to Eliminated Atmospheric Hazard Actual or Potential Hazard? Can it be Means to Eliminate Atmospheric Hazard Y N Y N Y N SECTION 4: Assessment of Serious Safety Hazard? Serious Safety Hazard? Actual or Potential Hazard? Means to Eliminate Atmospheric Hazard Y N Y N Y N N N N SECTION 4: Assessment of Ser	-	Dock Leveler Pit						5	Tighe & Bond		
Entry Location: Front of pit, under leveler Revision Date: - Entry Purpose: Repair and Maintenance - - SECTION 2: Confined Space Determination If needing to enter an enclosed space, indicate which of the following apply: Yes 1. Is the space large enough and so configured that you can bodily enter and perform work? X X 2. Does the space have limited or restricted means for entry or exit? (Would it be difficult to exit the space intended for continuous employee occupancy? (Is the space equipped with HVAC, desk, phone, lighting, or other typical conforts of continuous occupancy) X 3. Is the space intended for continuous employee occupancy? (Is the space equipped with HVAC, desk, phone, lighting, or other typical conforts of continuous occupancy) Yes Does this space meet the definition of a Confined Space? Yes SECTION 3: Assessment of Atmospheric Hazards Atmospheric Hazard Actual or Potential Eliminated? Means to Eliminate Atmospheric Hazard Actual or Potential Can it be Eliminated? Means to Eliminate Atmospheric Hazard Actual or Potential Hazard? Ves SECTION 4: Assessment of Serious Safety Hazards A		Various Dock Locations					-	Ju	-		
Entry Purpose: Repair and Maintenance SECTION 2: Confined Space Determination Yes I. Is the space large enough and so configured that you can bodily enter and perform work? X 2. Does the space large enough and so configured that you can bodily enter and perform work? X 3. Is the space intended for continuous employee occupancy? (It the space equipped with HVAC, desk, phone, lighting, or other typical conforts of continuous occupancy) X 3. Is the space intended for continuous employee occupancy? (It the space equipped with HVAC, desk, phone, lighting, or other typical conforts of continuous occupancy) X <i>If you have checked ANY of the highlighted boxes, you DO NOT have a confined Space. Ditervise, you have a Confined Space?</i> Yes SECTION 3: Assessment of Atmospheric Hazards Actual or Potential Hazard? Means to Eliminate Atmospheric Hazard Atmospheric Hazard Actual or Potential Hazard? Atmospheric Hazard Atmospheric Hazard Vidydrogen Suffide) X Image: Sectify below): Image: Sectify below image: Sectify below image: Sectify below image: Sectify Bazard Sectious Safety Hazards Actual or Potential Hazard? Does this space meet the criteria for a non-Permit Confined Space?

Confined Space Safety Assessment

SECTION 5: Assessment of Other Safety Hazards Actual or Can it be **Other Safety Hazards** Means to Eliminate Safety Hazard **Potential Hazard?** Eliminated? Υ Y Ν Ν Eye / Skin Hazard Х Mechanical Hazard Х Х Follow Hazardous Energy Isolation (Lockout/Tag-out) Procedures for dock leveler. Heat/Cold Stress Х Hot/Cold surfaces Χ Space Configuration Х Personnel are required to enter under the Egress / Access Х Х dock leveler. Use caution. Slippery Surfaces Х Elevated Work (Falls) Х Other (Specify below): Х **SECTION 6: Entry Classification** Yes No **Reclassification Assessment** Х 1. Is there an actual or potential atmospheric hazard (Section 3) - Even if controlled? Х 2. Can all Serious Safety Hazards (Section 4) be eliminated without entry? Х 3. Can all Other Safety Hazards (Section 5) be eliminated without entry? If you have checked <u>ONLY</u> shaded boxes, you can reclassify the space as a non-permit required confined space. Stop completing this form, and you may enter without a permit. Can this space be reclassified to a non-Permit Confined Space? Yes Permit Required Confined Space? No Should any planned or unplanned activities or hazards occur which are not listed above, such as welding,

Should any planned or unplanned activities or hazards occur which are not listed above, such as welding, cutting, chemical usage, etc. would require a reassessment of the of the space prior to entry.

SECTION 7: Photo(s)
