Use this form to organize your materials for writing your portfolio paper on the topic “What is Money?” Write the page number of places in the reading set where there is text you might use to help you to address the topic identified in the left-hand margin. This process will help you to write paragraphs that make connections between the readings (such as that they disagree or agree on a particular issue). However, these notes are not an outline, and if you use the form to go mechanically from subject to subject, the end result probably will not pass.
