**Job Title:**  
Paid Clean Energy Internships

**Organization Name:**  
Massachusetts Clean Energy Center

**Organization Description:**

Massachusetts is leading the way in innovative and comprehensive energy reform that will make clean energy a centerpiece of the Commonwealth’s economic future. The Green Jobs Act of 2008 created the Massachusetts Clean Energy Center (MassCEC) to accelerate job growth and economic development in the state’s clean energy industry. This new quasi-public agency serves as a clearinghouse and support center for the clean energy sector, making direct investments in new and existing companies, providing assistance to enable companies to access capital and other vital resources for growth, and promoting training programs to build a strong clean energy workforce that capitalizes on the job opportunities created by a vital new industry. In November 2009, Governor Deval Patrick signed an Act Relative to Clean Energy, which transferred the state’s Renewable Energy Trust Fund to MassCEC. The Renewable Energy Trust Fund was created in 1998 by the Massachusetts Legislature. The Renewable Energy Trust Fund comes from a systems benefit charge paid by ratepayers of investor-owned utilities in Massachusetts as well as municipal lighting plants (MLP) that have opted to participate in the Renewable Energy Trust. The average residential ratepayer in 2009 paid $0.29 a month. The Green Communities Act of 2008 established a mechanism for MLPs to participate in MassCEC’s Renewable Energy Trust fund and clarifies the implications of such participation. For more information about MLPs click here. MassCEC is committed to leveraging Massachusetts’ outstanding resources in academic research, technology entrepreneurship, and workforce skills to accelerate growth of the clean energy industry. The result of these efforts will be new technologies, new companies, and a workforce ready to roll up its sleeves to ensure Massachusetts’ place as a national clean energy hub.

**Work Schedule:**
Job Description:
The Massachusetts Clean Energy Internship Program helps prepare the next generation of clean energy workers by connecting students and recent graduates with Massachusetts companies in need of interns. The program helps provide Massachusetts clean energy businesses with a talented pool of young professionals, with MassCEC providing stipends for interns during fall, spring and summer sessions, who in turn are given valuable experience they can use as they begin their careers in this quickly-growing sector. Since its inception in 2011, the Massachusetts Clean Energy Internship Program has placed thousands of students and recent graduates at clean energy companies across the Commonwealth, with hundreds of those interns going on to receive full-time job opportunities at their host companies.

Qualifications:
To participate in the program, students and recent graduates must attend (or have attended) a Massachusetts college or university, or be a Massachusetts resident, with proof of residency, who attended an out-of-state college or university. Ph. D. candidates are not eligible to participate in this program.
