New Course – Spring 2016

Citizen Science for the Environment

Biology 381 - Sec. 7, Mandatory co-requisite Bio 382L Sec. 4, 4 credits

Want to learn about citizen science? You will have the opportunity to be outside, improve your observation skills, to collect citizen science data, analyze citizen science data using R and to work with an environmental organization on a citizen science project.

Students need junior standing in Biology or permission from the instructor. Students from the College of Science or Mathematics including Chemistry, Physics, Mathematics, Computer Science and Engineering are encouraged to apply as a class composed of students with a wide range of skills will lead to better teams to work on citizen science projects.

Email Prof. Rob Stevenson (robert.stevenson@umb.edu) or contact him through the Biology office 617-287-6600 for more information.

Course development is supported by the Campus Compact through the Office of Community Partnerships and the Office for Faculty Development.
