All students in the Chemistry Graduate Program must complete a Literature Seminar during their second semester in their program. This is a 30-40 minute presentation of a journal article that may be related to the student’s chosen research program. The presentation is more than purely a summary of that single article; instead, it must provide context and critical analysis of the research performed.

This form must be given to the Graduate Seminar Instructor four weeks in advance of the scheduled seminar as verification that the research advisor is aware of the student’s topic and primary article chosen as the backbone of the Literature Seminar.

**Student Information**

Name (print)  ____________________________________________

Advising Professor (print)  __________________________________

Date of Seminar  __________________________________________

**Seminar Information**

General Topic of Seminar  ____________________________________

Current Primary Paper (use ACS citation format)  __________________________________

**Signatures**

Student Signature / Date Signed  __________________________________

Advisor Signature / Date Signed  __________________________________

Graduate Seminar Instructor or GPD Signature / Date Signed  __________________________________
