Fix a VoiceThread Link that “Breaks” in a Course Copy

When a Blackboard course is copied, the VoiceThread links break.

For example, if you taught a course in the Spring semester and created a VoiceThread lecture in each weekly session, when the course is copied over to be taught in the Fall semester, the links break. The VoiceThreads themselves are unaffected.

Navigate to the location in your course where the VoiceThread link is located and follow the steps below to relink your VoiceThreads.

Part 1: Delete the “Broken” VT Link

Step 1: Hover over the right side of the VoiceThread link. Click the down arrow to open the menu.
Step 2: On the dropdown menu, click Delete.
**Part 2: Create a New VoiceThread Link**

Step 3: Click **Build Content**.
Step 4: Click **UMB VoiceThread**.
