Check Point VPN Set-up and Configuration
Windows 10

These instructions will show you how to install and configure your UMass Boston VPN connection on a Windows 10 machine. All action items will be in bold. The instructions are written in two parts: Installation, Configuration and Establishing a Connection, Disconnecting.

These instructions assume you have already logged into the Windows Store with a Microsoft Account.

PART ONE: INSTALLATION

You will need to download the client from the Windows Store. To launch the Windows Store, go to the Task Bar along the bottom of your screen and look for the Windows Store icon. Launch the Windows Store by Clicking the icon in the System Tray.

In the search bar in the upper right hand corner of the Windows Store window, enter “Check Point Capsule VPN”. Click “Free” to get the capsule.
When you click to download the Check Point Capsule, “Free” will change to a progress bar, and once download is complete, will change to “Open” to allow you to launch the application. **This will not set up the VPN – Close the Windows Store** and continue on with these instructions.

END PART ONE: PLEASE CONTINUE TO THE NEXT SECTION FOR CONFIGURATION AND ESTABLISHING A CONNECTION.
Go to the tray in the bottom right portion of your screen and Click the Network icon. In the Network & Internet Settings page, Click “Add a VPN Connection”.

In the VPN Provider field, Choose “Check Point Capsule VPN” from the drop-down menu. In the Connection name field, you can choose a name that will identify this network to you. For ease of setup, “UMB VPN” is recommended. In the Server name or address field, Type “remote.umb.edu”. If you would like your sign-in information to be saved, Ensure the checkbox is marked for “Remember my sign-in info”. Click “Save”.

In the VPN Provider field, Choose “Check Point Capsule VPN” from the drop-down menu. In the Connection name field, you can choose a name that will identify this network to you. For ease of setup, “UMB VPN” is recommended. In the Server name or address field, Type “remote.umb.edu”. If you would like your sign-in information to be saved, Ensure the checkbox is marked for “Remember my sign-in info”. Click “Save”.
Configuration of the connection is complete! You will see your newly added connection in the list of available VPN connections.

![VPN settings](image)

To establish a connection, **Click “Connect”**.

![VPN connection](image)

**Select “Username and Password”** from the drop-down menu and **Click “Next”**.
At this stage, you will be prompted to enter your UMB credentials. In the Username field, enter your UMB email minus the @umb.edu (i.e. first.last). In the Password field, enter your current UMB e-mail password, then Click “OK”. You are now connected!

(Note – Future connections aside from initial setup, see below.)

To access the new connection in the future, go to the tray in the lower right corner of your screen and click the Network icon, then click “UMB VPN”.

In the displayed Networks screens (pictured below), Select “UMB VPN”, then Click “Connect”.

END OF PART TWO.
PLEASE CONTINUE TO PART THREE BELOW FOR DISCONNECTING.
PART THREE: DISCONNECTING

Go to the tray in the lower right corner of your screen and Click the Network icon and select “UMB VPN”.

In the UMB VPN screen, then Click “Disconnect”. You are now disconnected.

END OF PART THREE.

Thank you for using these instructions. If you experience issues during the installation process, please contact the IT Service Desk at 7-5220.

If you have feedback and/or corrections for these instructions, please email IT.Security@umb.edu.
