Updating Internet Explorer Settings for the UPK Do It! Mode

This job aid provides step-by-step instructions on how to allow script-initiated windows without size or position constraint. These steps must be completed to access the UPK Do It! mode within an application.

Internet Explorer 7.0 & 8.0

Step 1. Navigate to Internet Explorer > Tools > Internet Options > Security

The Internet Options page opens.

Step 2. Select the icon.

Step 3. Click the Custom level... button at the bottom of the window.

The Security Settings window opens.
### Step 4.
Scroll down to **Allow script-initiated windows without size or position constraint.**

### Step 5.
Select the **Enable** radio button.

### Step 6.
Click the **[OK]** button.

A **Warning!** window appears.

### Step 7.
Click the **[Yes]** button.

The **Security** tab reopens.

### Step 8.
Click the **[OK]** button.

**End of Procedure**
