UMB-Staff-Fac Wireless Windows XP

As a first step, please be aware that many laptop manufacturers provide their own wireless LAN utility to manage the wireless connections. If you have one of these laptops that utilize this feature, it is advised you disable it and use Windows to manage your wireless networks. You are going to have to manually create a profile called UMB-Staff-Fac under your wireless networks. This document describes how to use Windows to do this.

Go to Control Panel and open up Network Connections.

Right-click on Wireless Network Connections and left-click Properties.
Select the **Wireless Networks** tab. Make sure that there is a check in the box where it says "**Use Windows to configure my wireless network settings**". Click **Add**.

Enter **UMB-Staff-Fac** for **Network name (SSID)**. Remove check in box where is says "**Connect even if this network is not broadcasting**". Make other selections as shown. Go to the **Authentication** tab.

Select **Protected EAP (PEAP)** for **EAP type**. Remove check in the box where is says "**Authenticate as computer when computer information is available**". Click **Properties**.

Remove check in the box where is says "**Validate server certificate**". Click **Configure**...
Remove check in the box where it says "Automatically use my Windows logon name and password (and domain if any)". Click OK.

Click OK.

Remove the check in the box where it says “Connect when this network is in range”. Click OK.
Click **OK**.

You might get a message like the one below notifying you that wireless networks have been detected. Just click on the message.

![Message]

“This should bring up a list of wireless networks.”

![List of wireless networks]
Select **UMB-Staff-Fac** and click on the button that says **Connect**.

Next, you might see the screen below. Click on the message.

You should now see the logon prompt below. Enter your UMB email username and password. Do not enter a domain. Do not select "**Save this username and password for future use**". Click **OK**.
You might next see the message below. You should be able to use your browser or other Internet dependent applications.

If you do not receive a notification that you are now connected, right-click on the wireless icon in the lower right-hand corner of the screen and left-click on View Available Wireless Networks.

Select UMB-Staff-Fac from the list. Then click the Connect button at the bottom.

You may get the prompt to enter your username and password as stated before. Remember to enter just your UMB email username and password and DO NOT put in the domain and DO NOT select "Save this username and password for future use". Click on OK.
