Smoke Alarm Safety

Most fatal fires occur at night. Every home needs working smoke alarms to provide an early warning.

- Install smoke alarms in all sleeping rooms, hallways that lead to sleeping areas, basements and each addition level of your home.

- Smoke alarms should be mounted on a ceiling 4” from the wall, wall mounts should be 4-12” form the ceiling.

- Do not install near draft areas.

- A good time to remember to check your smoke alarm and change the batteries is when you change your clocks twice a year as daylight savings time begins and ends.
